Style Guide

July 7th, 2015

TECHFLOW

TABLE OF CONTENTS

1.0   Purpose and Overview

The purpose of this document is to familiarize the reader with the style guide developed by TechFlow for the Food and Drug Administration (FDA) in support of the Drug and Risk Information (DARI) public website. It includes links to style guides that were utilized build the application user interface and aligns with the standards on usability.gov.

2.0   Style Guide Goals

The goal was to quickly create a responsive prototype application that worked on multiple devices and screen sizes. To accomplish this we based and started our application using bootstrap and an open source theme, then customized the look to our taste.

Following the bootstrap and theme style guides was a good general starting point for the application. This allowed out to quickly create uniform and organized markup from the ground up. They provided a grid system, various components, and responsive elements that can also be easily customized to our own needs.
